

The TADGER is a fuel-saving and emission reduction technology currently on the market in Canada. It has been tested over 12 million kilometers so far, with an average fuel economy of 5.5 %

Think how this can contribute to the fight against pollution in Canada,
but most of all...

what it means for your company in terms of economy every year!

Interested in finding out more?

Visit our Website to learn about our test protocol or our Flow Meter testing procedures.

We'll be happy to give you an estimate of the potential savings for your entire fleet and share the results achieved to date with some Canadian companies.
